A CENTURY'S WORTH OF INNOVATION

## Normal Vent for Genset Tanks

**2175**

### Features:

The vent is designed for normal venting requirements of Genset Tanks. Standard pressure of 1 psig with full open pressure of 2.5 psig and airflow of 6,848 SCFH. An optional pressure setting of 3 psig open and full open pressure of 5 psig with 9,942 SCFH airflow is available. Vacuum is set to open at 0.5 psig and full open at 1.0 psig and 3,617 SCFH airflow. Materials used in construction are aluminum with stainless steel and monel internal parts.

Part No.	Size	Material	wt/Lbs.	Set pressure
2175-03-2000	2"	Aluminum	3.0	1 PSIG
2175-03-2300	2"	Aluminum	3.0	3 PSIG

### Maintenance Note:

Check openings periodically for build-up of debris.
