

8" Breather Vent

Features

Durable breather vent for use on ASTs or tanks requiring large free flowing ventilation. Aluminum base and lid is non-sparking, lid is lockable. Standard gasket material is Buna-N.

Flange bolt pattern conforms to API flange footprint.

Bolt Pattern:

(16) - 1/2" diameter holes on a 10-3/8" B.C.

Airflow Rating:

Pressure Relief Flow

220,000 SCFH @ 2.5 psig

Vacuum Relief Flow

10,300 SCFH @ 1oz/in²

Part No.	Size	Press/Vac	Wt.lbs
0256-01-8000	8"	breather	21

Maintenance Note:

Perform regular scheduled maintenance every couple of months or as per plant's maintenance schedule depending on the environment and operating conditions. Check gaskets for wear, swelling or cracking and replace as needed. The base gasket needs to only be replaced when a leak is noticed at the bolt area or if the hatch is removed.

Gaskets and seats need to be inspected and cleaned. This will help to reduce the accumulation of residue that can deteriorate the performance of the hatch.
