

Telescopic Drop Tube

The Clay & Bailey Telescopic Drop Tube is designed for easy handling and field installation. Telescopic tubing assembly consists of inner tube nested in outer tube. The total drop tube length is split into two sections. The drop tube threads directly on the valve body and extends to full length via gravity.

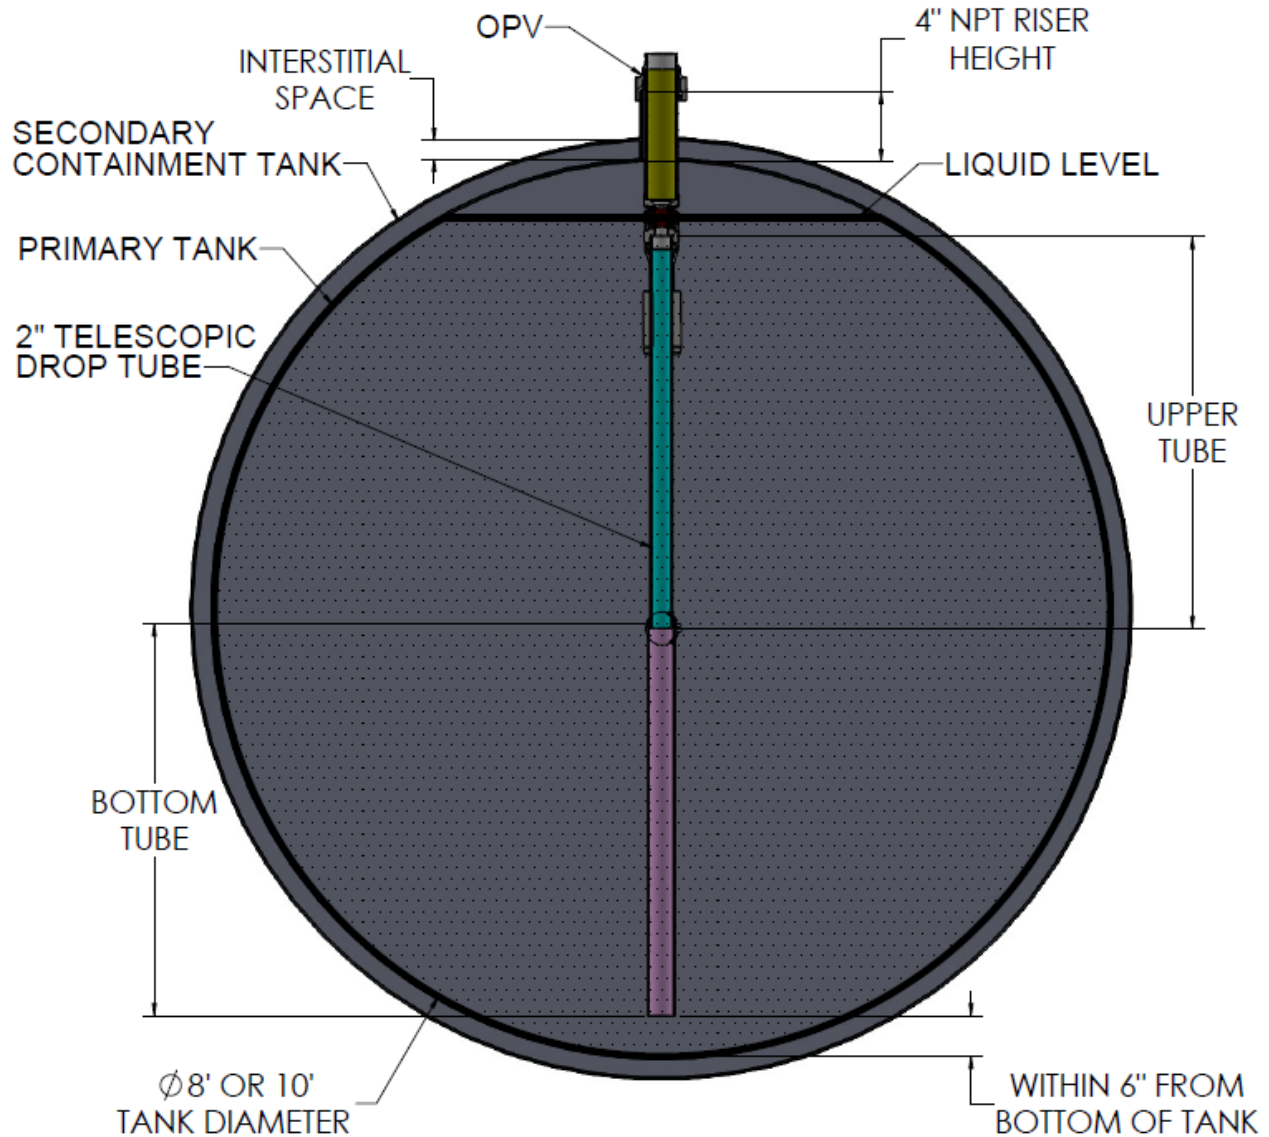

- Available in 2”.
- Recommended for use with taller / larger diameter tanks.
- Installation is easy since the drop tube is split into two sections which eliminates handling of long cumbersome single piece drop tube.
- Extends to full length via gravity.
- Saves space for storage and transportation.
- Aluminum telescopic tubing is lightweight, easy to handle and transport.
- No flow reduction.
- 2” drop tube can be used with GenX, 2X4 and 3X4 OPVs.
- Typical extended length 8’ and 10’, other lengths available.
